

SUREHOLD®

Adhesives for every application

INDUSTRIAL STRENGTH SURFACE INSENSITIVE QUICK-SETTING CYANOACRYLATE ADHESIVE

**Specially formulated for bonding
dry, porous and acid surfaces
*such as wood, paper made products,
PU foam, cork, rubber and ceramics***

601 is designed for the assembly of difficult to bond substrates that require high shear strength.

601 has been specially formulated to achieve rapid bonding between well-mated surfaces, such as rubber, metals, plastics, glass, etc.

601 is also suitable for bonding porous or absorbent materials such as wood, paper and fabric.

• When a thin layer of **SUREHOLD® 601** applied between two surfaces and comes into contact with atmospheric moisture, a rapid polymerization occurs producing the ultimate bond.

601 Fast setting and is suitable for continuous or automated production lines.

Color: Transparent, colorless to straw color

Part No.	Product	Size	Case Qty
SH-601	Surface Insensitive Cyanoacrylate	20gr bottle	25
SH-6015	Surface Insensitive Cyanoacrylate	500gr bottle	1
